ABOUT US

Established in 2007, EuroPlast has built a strong reputation as a trusted manufacturer of high-quality aluminum windows and doors. With nearly two decades of experience, we have proudly served homeowners, architects, and builders with innovative, durable, and stylish aluminum solutions that combine performance with modern design.

At EuroPlast, we specialize in crafting aluminum windows and doors that not only enhance the aesthetics of a space but also deliver long-lasting functionality, energy efficiency, and low maintenance. With a focus on precision engineering, customer satisfaction, and continuous innovation, we are committed to delivering excellence in every product we create.

As we continue to grow, our mission remains the same: to provide reliable, elegant, and efficient aluminum solutions that stand the test of time.

EUROPLAST
uPVC / Aluminum Windows & Doors

WHY CHOOSE **ALUMINUM WINDOWS & DOORS?**

Aluminum windows and doors offer a perfect blend of durability, style, and performance making them one of the most popular choices for modern construction and renovation projects.

- **STRENGTH & DURABILITY**

Aluminum is a highly durable material that doesn't warp, crack, or swell over time. It withstands harsh weather conditions and maintains its shape and integrity for decades.

- **LOW MAINTENANCE**

Unlike wood, aluminum requires minimal upkeep. It doesn't rust and can be easily cleaned with basic maintenance, saving you time and cost in the long run.

- **SLEEK, MODERN DESIGN**

Aluminum frames allow for slim profiles and larger glass panels, offering a clean, contemporary look that maximizes natural light and views.

- **ENERGY EFFICIENCY**

With thermal break technology and proper glazing, aluminum windows and doors can deliver excellent insulation, helping maintain indoor temperatures and reduce energy bills.

- **SUSTAINABILITY**

Aluminum is 100% recyclable and eco-friendly. Using aluminum products contributes to sustainable building practices and a reduced carbon footprint.

- **VERSATILITY & CUSTOMIZATION**

Available in a wide range of finishes, colors, and configurations, aluminum frames can be tailored to match any architectural style – from minimalist to classic.

EUROPLAST
uPVC / Aluminum Windows & Doors

LESS FRAME , **MORE VIEW**

Enjoy uninterrupted views and abundant natural light with our sleek aluminum windows. Engineered for strength and style, aluminum allows for ultra-slim frames that maximize your glass area – giving you a wider, clearer view of the outside

TALL WINDOWS & DOORS

Make a bold statement with our tall aluminum windows and doors – designed to add height, elegance, and grandeur to any space. The slim, sturdy frames of aluminum allow for expansive glass panels, creating a striking vertical aesthetic that draws the eye upward and fills your interiors with natural light.

ALUMINUM SLIDING WINDOWS & DOORS

Smooth, Stylish, Space-Saving
Bring elegance and efficiency together with our aluminum sliding windows and doors. Designed for smooth operation and modern living, these space-saving solutions glide effortlessly to open up your home without taking up extra room.

With slim, durable aluminum frames and large glass panels, they maximize natural light, provide wide-open views, and create a seamless transition between indoor and outdoor spaces. Perfect for patios, balconies, living rooms, and more.

ALUMINUM SLIDE & FOLD DOORS

Transform your living or working space with our aluminum sliding and fold doors – the perfect combination of flexibility, elegance, and space-saving design. Whether you're looking to create a seamless indoor-outdoor flow or open up an entire wall, these doors are designed to move smoothly and stack neatly for a wide, unobstructed opening.

ALUMINUM FIXED WINDOW

Aluminum fixed windows are all about bringing in light and showcasing the outside world. Designed without opening mechanisms, these windows offer a clean, uninterrupted view.

ALUMINUM CASEMENT WINDOWS & DOORS?

Classic Design, Modern Performance

Discover the perfect blend of tradition and technology with our aluminum casement windows and doors. Hinged at the sides and opening outward, these systems offer excellent ventilation, clear views, and a timeless, elegant appearance.

CHOICE OF GLASS

- **CLEAR GLASS**

Standard clear Glass or Float Glass has a slight green tint to the body of the glass and a very dark green edge detail while Extra Clear Glass or 3 Starphire has very little tint to the body of the glass appearing almost completely transparent, the glass edge has a very slight crystal

- **FROSTED GLASS**

Frosted glass is produced by the sandblasting or acid etching of clear sheet glass. This creates a pitted surface on one side of the glass pane and has the effect of rendering the glass translucent by scattering the light which passes through, thus blurring images while still transmitting

- **LAMINATED GLASS**

Laminated glass is a type of safety glass that holds together when shattered. The interlayer keeps the layers of glass bonded even when broken, and its high strength prevents the glass from breaking up into large sharp pieces

- **TEMPERED GLASS**

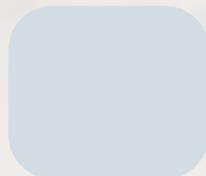

Tempered or toughened glass is a type of safety glass processed by controlled thermal or chemical treatments to increase its strength compared with normal glass. Tempering puts the outer surfaces into compression and the interior into tension.

- **REFLECTIVE GLASS**

Reflective glass is clear or tinted glass that has a very thin layer of metal or metallic oxide on the surface. The reflective coating is applied during the float process. The reflective coating reduces heat gain and glare from the outside while allowing visible light to enter. Note: All tinted glass and Reflective glass are also available in Toughened process, Double Glazing Process, Laminated Process.
